

**GroGreen® Feed&Shine® Roses**  
Foliar fertiliser for roses (Concentrate)

**HEALTHY ROSES**

GroGreen Feed & Shine Roses Concentrated is a specially-developed micronutrient fertiliser for all types of roses (except for the *Rosa Rugosa* group). Applied once a week, it will ensure that roses stay healthier and more resistant towards leaf fungi such as rust, mildew and blackspot. GroGreen Feed & Shine Roses is the extra supplement that, together with organic fertiliser, ensures that your roses constantly thrive. The product is environmentally-friendly and gentle towards roses and nature in general.

It contains micronutrients, seaweed, iron, the plant oils tea tree, clove and citronella, and surfactant. The documented effect of the micronutrients gives strong, healthy root and plant growth, and efficiently prevents iron, copper, magnesium, manganese and zinc deficiency. The plant oils give the leaves a beautiful appearance, protect them against wind and weather, and keep them dry. The surfactant ensures that the plant fully absorbs the nutrients.

**Use:**

- The product is concentrated and must be mixed with water in the ratio 1:100. Applied by garden sprayer.
- Shake the mixture well and spray it on all leaves until it drips off.
- The amount to use depends on the plant size.
- Apply once a week from May to September.
- Spray on dry leaves and in dry weather.
- Do NOT spray in direct sunshine.
- Use the mixture within eight days.

**Mixing ratio:**

Mix 1:100 = 0,5 Liter Concentrated with 50 Liters of water.

**Guaranteed content:**

GroGreen Feed & Shine Roses Concentrated is a fertilizer with EDTA\* chelated micronutrients, seaweed, natural plant oils and surfactant. Green in colour. pH value of the product is 7.5.

**Ingredients other than plant nutrients:**

Tea tree oil 0.5%, citronella oil 0.5%, clove oil 0.5%, seaweed 1.75%, surfactant 34%, and magnesium.

**Storage:**

Store frost free.

\* EDTA means "fully plant available".
